

Lagoon 42

Description

Currently the only Lagoon 42 on the market in the UK.

The 42 is the flagship of the Lagoon fleet, finding the perfect combination of cruising and comfort. She's big enough to spend prolonged periods on board whilst still being easy enough for a couple to handle.

With at least 9 Lagoons entering into the ARC this year, could this be the ideal boat to start a world cruise? She is UK VAT paid so offers the perfect set up to get to know her in the UK before setting off further afield.

2B3 was commissioned in 2017 and has the larger 57 hp engine and the 3 bladed folding prop giving her more power to punch into any swell. She also has a square top main, increased solar and battery capacity and a water maker. She was coppercoated in the UK by a local boatyard. Inside she is the preferred 3 cabin version giving the owner their own hull as their cabin and en suite.

Berthed at our Falmouth office she is ready for viewing now.

Please call us for further images and information.
